**Mo. 9896470047**

```
//Hello World Program
#include<stdio.h>
#include<conio.h>
void main()
{
clrscr();
printf("Hello C");
getch();
}
```

---

Output  
Hello C

---

## 2. Print Hello C with Keyword definition Program Description

```
//void null type without any type
void main() //main method, function entry point
{ //scope of main start from here
clrscr(); //function to clear the screen
printf("Hello C"); // to print any message / prompt
getch(); // function to get one character to hold screen
} // end of main scope
```

## 3. Print Address using \n and \t

```
void main()
{
clrscr();
printf("Saini Technologies ");
printf("\n\t\t\t\tG.T. Road Panipat");
printf("\n\t\t\t\tEmail : sushilsaini04@gmail.com");
getch();
}
```
